Olivia Witt

Profile

With ~3 years of hands-on experience, I have worked in agile environments utilizing technologies such as Vue.js React, Next,js, GraphQL, TypeScript, Node.js, and Microsoft Azure. Additionally, I possess the ability to use design tools such as Figma.

I am outgoing, team-oriented, and analytical. One of my strengths is persistence. I recognize the importance of persistence and am committed to diving deep into the code to find effective solutions. I am highly motivated, continuously refining my approach to align with best practices, and see every task as an opportunity for growth and improvement.

I believe I can be a valued team member and have a lot to offer. I look forward to discussing the role further and am happy to address any questions you may have.

Education

2021-2025

Software developer

- Full-Stack Immersion
- Collaboration & User Manual Documentation
- JavaScript Basics, Server-Side Programming and Node.js, Client-Side Programming & Vue / React / Next.js, Cypress Testing in the Development Process
- UI / UX design with Figma & SCSS, Tailwind CSS styling
- Working with Hardware side using Websocket and GraphQL subscriptions
- Server handling, MySQL, MsSQL
- Basic Linux Command Line Usage for Development
- Fundamental Knowledge of C Programming

Work Experience

2023 – 2025

Sarsys-asft AB, Software Developer

Malmö, Sweden

— Designing and implementing dynamic features using Vue.js to create a seamless user experience. Building reusable components and implementing libraries for future use.

— Building and maintaining efficient GraphQL APIs and leveraging GraphQL subscriptions for real-time, event-driven updates across the application.

— Collaborating across front-end and back-end teams to ensure smooth data flow and system scalability, optimizing both client-side and server-side performance.

2023 – 2023

Greencarlane, Frontend Developer Intern

Copenhagen, Denmark

— Developing new user-facing features using React.js

— Building reusable components and implementing front-end libraries for future use.

— Debugging & optimizing code to enable maximum performance across devices and browsers.
